Promotores de Salud improves employee and family health by empowering employees to:
- Adopt healthy lifestyles
- Overcome barriers to health care
- Take greater responsibilities for their health and well-being

Promotores de Salud facilitates access to local services by providing employees with:
- Community resource guide
- Children’s resource guide
- Referrals

Promotores de Salud is an established cultural broker in the Harrisonburg-Rockingham community
- Providing cross-cultural services and health education to area LEP (limited English proficiency) residents since 1999
- Delivering Spanish-language health information to homes, churches and worksites
- Training and graduating 168 lay health promoters to date
- Working to reduce health disparities
- Collaborating with area agencies to improve access to area health & human services.

As trained health resource persons, Promotores de Salud
- Use their cultural expertise, local knowledge, health care training, and outreach skills to serve their community
- Provide your employees with accurate, culturally-appropriate health information
- Empower your employees to become participants, partners and directors of health care in their families and community
